

Cleveland Middle School Parent Night for Upcoming 6th Graders

Students and parents are invited to CMS for this parent night. The goal of this event is to advise students and parents on the various classes, sports, and clubs that CMS has to offer. CTE sets up a booth to promote our classes and give out important information.

Cleveland Middle School

10 PM				
11 PM				
Midnight				

Cleveland Middle School **Career & Technical Education (CTE)**

Cleveland Middle School has three CTE Academies: Medical Science, Engineering Technology, and Business Communications.

These Academies offer different classes for each grade level at CMS. No matter the topic, CTE classes create opportunities for CMS students to engage in hands-on and real-life experiences.

6th Grade CTE Courses

- **Medical Science**

Students will be introduced to the healthcare field. The topics covered will include the history of medicine and the different systems of the body. Students will do multiple projects and dissections to support their learning.

- **Business Communications**

Students will explore a variety of communication technologies. They will develop their knowledge of essential technology concepts and be introduced to photography, graphic design, presentations, public speaking, and more.

- **Engineering Technology**

Students will learn the basics of CAD 3D modeling as they use the computer to create a 3D model and learn how a 3D printer works. They also learn about machines by using LEGOs to build and test various structures.

Want to find out more about our Cleveland Middle School CTE classes? Visit our website at cmsraiders.com and follow CMS CTE on Twitter @CteMiddle.
